

Jackson & Pearl Mixed Use Center

Jackson, Wyoming

Use: Retail, general office, multi-family residential & structured parking

This three-story mixed use building is located on a key corner in the heart of downtown Jackson Wyoming. Retail uses are at the street level, office space is on the second floor, and the top floor features six luxury condominium units. Rough wooden columns and river rock address the Western vernacular, while a wooden boardwalk encourages pedestrian activity. Structured parking is provided below grade.

The contrast of modern design with local materials and building tradition update the vernacular language of the American West to a viable solution for the future.
